

# REACH Statement

Effective 2025/06/25

## Statement on the Regulation EC No. 1907 / 2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH)

For the purposes of the REACH Regulation (according to Article 3 'Definitions') IMM Photonics GmbH manufactures and distributes "articles" from which no substances are released. Therefore IMM Photonics GmbH is generally not subject neither to the obligation to register (Article 7) nor to the obligations under articles 31 and 32.

We are subject to the duty to supply information to our customers according to Article 33, provided that one of the articles supplied by us contains a substance of very high concern (SVHC) in a concentration above 0.1 percent weight by weight (w/w).

The SVHC list currently comprises 250 different substances and can be found on the web pages of the European Chemicals Agency (ECHA) at <https://echa.europa.eu/de/candidate-list-table>

In our own interest and against the backdrop of a demand for high supply and product safety we are taking our information duties very seriously. We comply with the regulatory requirements according to Art. 33 of the REACH Regulation as follows:

We are in touch with all our suppliers and have them give us binding information with regard to whether listed SVHCs above 0.1 percent weight by weight (w/w) are contained in the products delivered.

We commit all our suppliers to immediately inform us if one of the products delivered to us exceeds the threshold of 0.1 percent weight by weight (w/w) for an SVHC.

In case we receive this kind of information from our suppliers and in this way obtain knowledge that one of our articles also exceeds the threshold of 0.1 percent weight by weight (w/w) for an SVHC, we will inform the respective customers within the scope of our business relationship.

This information is based on the present state of our knowledge and experience. We can not assume any warranty or liability for factors beyond our knowledge and control.
